

TAP Rubber Trap Curtains are crafted from natural rubber providing superior healing properties to most other rubber. They ensure a safer shooting environment by effectively reducing errant bullets and ricochets. The special self-healing properties withstand repeated rounds, providing economical and effective protection for shooters at the range. The curtains can hang vertical or installed on angle across the trap rubber keeping the bullet trap clean from paper and gun powder which reduces the risk of fire. Once the bullet passes through the curtain and enters the bullet trap, it stays in the trap protecting structures like lights, pipes, and ventilation ducts.

FEATURES

○ FEATURES

- Cut, tear and abrasion resistant
- Flexibility and rebound elasticity (snap)
- ASTM Grade: D2240, D412
- Natural rubber superior healing
- Life cycle est 3,000 rounds
- Self healing smooth surface
- Reduce ricochet and bullet splatter
- Keep range clean reducing risk of fire
- Bullet rated 9mm to 7.62mm
- 1/8"x48"x 50'. Weight 144 lbs
- 1/4"x48"x 40'. Weight 219 lbs
- Part # TBC3135
